<b>Science</b>	<u><b>Earth and Space</b></u> Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.  Describe the movement of the Moon relative to the Earth.  Describe the Sun, Earth and Moon as approximately spherical bodies.  Describe the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.	<u><b>Forces</b></u> Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object.  Explain the impact of gravity on our lives. Identify the effects of air resistance, water resistance and friction, which act between moving surfaces.  Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.	<u><b>Properties and Change of Materials</b></u> Compare and group together everyday materials on the basis of their properties.  Comparative and fair tests, for the particular uses of everyday materials. Demonstrate that dissolving, mixing and changes of state are reversible changes.  Explain that some changes result in the formation of new materials, and this kind of change is usually not reversible.	<u><b>Properties and Change of Materials</b></u> Know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution.  Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating.	<u><b>Living Things and their Habitats</b></u> Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird.  Describe the life process of reproduction in some plants and animals.	<u><b>Animals including Humans</b></u> Describe the changes as humans develop to old age.
